

Role: Technical Director

Location: New Delhi

Reporting to: CEO

Key Partners: Government of India, World Bank Group, International Federation of Red Cross, Rippleworks, Mulago Foundation, HDFC Ergo, IIT-KGP

Role and Responsibilities

Technical Leadershi & Strategy

- Lead and guide the design, review, and implementation of high-quality engineering interventions across ZFC and ZFD projects to ensure safer roads.
- Provide technical leadership on road safety audits, crash diagnostics, infrastructure improvement plans, and urban design-based traffic calming.
- Develop scalable, data-backed, and culturally contextual solutions to address safety issues across diverse geographies.
- Lead development and delivery of training modules for engineers, enforcement institutions and Govt. Officials.
- Build internal technical leadership pipeline

Program Oversight & Execution

- Coordinate across verticals (enforcement, trauma care, community engagement) to ensure integrated delivery of the ZFC and ZFD solutions.
- Oversee external consultants, civil contractors, and state agencies involved in implementing engineering and enforcement recommendations.
- Monitor quality, timelines, and cost-effectiveness of all technical deliverables and field implementations.

Innovation & Learning

- Stay abreast of new technologies, methods, and policies related to road safety, enforcement automation, and trauma systems.
- Experiment with and integrate relevant innovations into SLF's programs for greater efficiency and impact.
- Writing and contributing to technical publications

Stakeholder Engagement

- Work closely with government departments (e.g., PWD, NHAI, Police) and international partners to ensure smooth implementation.
- Represent SLF in technical meetings, conferences, and workshops.

Professional Experience

- Degree in Civil Engineering, Urban Design, or Transportation Planning. A Master's degree will be an added advantage.
- 10+ years of progressive experience leading infrastructure or urban transport projects, preferably with a focus on road safety.
- Proven experience in road safety audits, street redesign, or highway safety interventions.
- Familiarity with enforcement systems and trauma care infrastructure (preferred but not mandatory).
- Strong project management skills, including team leadership, vendor oversight, and cross-functional coordination.
- Ability to work under pressure, travel extensively, and adapt quickly to field realities.
- A commitment to public interest work, with a sharp mind for problem-solving and an empathetic approach to community needs.

What You'll Gain

- A unique platform to lead change at scale, with the ability to directly influence infrastructure and policy in India and beyond.
- The chance to work with India's only organization that

combines system reform with on-ground action for road safety.

- Cross-sector exposure across engineering, governance, public health, and civic engagement.
- An entrepreneurial environment that values innovation, courage, and execution excellence.
- An opportunity to be part of a globally recognized movement saving thousands of lives each year.
