Job Summary:

A Consultant Pediatrician is responsible for providing specialized medical care to infants, children, and adolescents. The role involves diagnosing and treating a wide range of pediatric conditions, ensuring preventive healthcare, and guiding families on child health and development.

Key Responsibilities:

- Diagnose and treat acute and chronic illnesses in children
- Conduct routine check-ups, immunizations, and growth monitoring
- Manage neonatal and pediatric emergencies
- Provide developmental and behavioral assessments
- Prescribe medications and treatment plans
- Collaborate with other specialists for multidisciplinary care
- Educate parents/guardians on nutrition, hygiene, and disease prevention
- Maintain accurate medical records and documentation
- Ensure compliance with hospital policies and medical regulations
- Participate in clinical audits and quality improvement initiatives

Qualifications & Requirements:

- MBBS with MD/DNB in Pediatrics
- Valid medical license/registration (e.g., Medical Council)
- Strong clinical and diagnostic skills
- Excellent communication and interpersonal abilities

- Ability to handle pediatric emergencies
-

Skills & Competencies:

- Child-focused and compassionate approach
 - Decision-making and problem-solving skills
 - Team collaboration
 - Attention to detail
 - Time management
