Problem Solving

About Company

The organisation is a financial and tax consulting start-up with a team of 50+ professionals, including CAs, CS, CMAs, CFAs, engineers and lawyers. We partner with MNCs, start-ups and PSUs across accounting, tax, financial services and audits.

Hiring Objective

1. Positive, curious and continuous learning mindset.
2. Enjoys challenges and is strongly result-oriented.
3. Shares a long-term vision and commitment to the organization.

Requirements

- 3–5 years of professional experience as a PHP Developer.
- Strong proficiency in **Core PHP** and **Laravel (3+ years)**.
- Good working knowledge of **HTML5**, **CSS3** and **Bootstrap**.
- Understanding of responsive design and front-end integration.
- Solid problem-solving, debugging and optimization skills.
- Clear written and verbal communication; collaborative mindset.

Roles & Responsibilities

- Develop, record and maintain web applications using Core PHP and Laravel.
- Build efficient, testable and reusable PHP modules and APIs.
- Integrate front-end components (HTML, CSS, Bootstrap) with back-end logic.
- Troubleshoot, test and maintain the core product for high performance and responsiveness.
- Ensure application security, scalability and best coding practices.
-

Stay current with modern PHP/Laravel and web development trends.
